

VIGNESH S

Computer Science Engineer | Full Stack Developer | Competitive Programmer

kit27.cse62@gmail.com | +91 9489251910 | Coimbatore, Tamil Nadu

[GitHub](#) | [LeetCode](#) | [CodeChef](#) | [LinkedIn](#) | [Portfolio](#)

OBJECTIVE

Final-year B.E. CSE student at KIT Coimbatore with 1500+ DSA problems solved (LeetCode 1519+), hands-on MERN stack development, and a deployed ML project. Adaptable across Software Engineering, Full Stack, Backend, and Data-driven roles — bringing algorithmic depth, clean code, and a product mindset.

EDUCATION

B.E. — Computer Science and Engineering 2023 – 2027

KIT – Kalaigarkarunanidhi Institute of Technology, Coimbatore, India **CGPA: 7.95/10**

PROFESSIONAL EXPERIENCE

Full Stack Development Intern Jun 2025 – Jun 2025 (1 Month) LearnLogicify Technologies, Tamil Nadu

- Developed MERN-based full-stack features, improving application responsiveness by approximately 20%.
- Integrated REST APIs and optimized MongoDB and MySQL database queries, reducing overall load time.
- Participated in Agile sprint cycles, contributing to code reviews and on-time delivery of features.

PROJECTS

NueroLoop - AI-Powered Learning Journal Full Stack Developer

Tech: React, Node.js, Express, MongoDB, Groq AI, SendGrid [Live Demo](#) | [GitHub](#)

- Built a full-stack AI learning journal where users write study notes and the system auto-generates quiz questions, detects weak topics, and schedules spaced repetition revision using a forgetting curve algorithm.
- Integrated Groq LLM API to summarise notes, extract topics from uploaded PDFs, and power a Socratic AI tutor chat that guides users with questions rather than direct answers.
- Implemented SendGrid email reminders via a Node-cron scheduler, JWT authentication, a GitHub activity heatmap, and a streak-based leaderboard — serving as a complete EdTech SaaS product.

Version Control System Backend Developer

Tech: Python, MySQL [GitHub](#)

- Built a custom VCS from scratch in Python and MySQL with file tracking, version history, commit management, and automated backups.
- Implemented file comparison, rollback functionality, and secure database-driven storage — replicating core Git internals.

Traffic Detection and Classification Deep Neural Network

Tech: Python, TensorFlow [Live Demo](#) | [GitHub](#)

- Designed and trained a deep neural network for real-time traffic analysis, achieving approximately 92% classification accuracy.
- Built a full preprocessing pipeline with model evaluation metrics suitable for production-grade deployment.

COMPETITIVE PROGRAMMING

- Solved 1500+ problems across LeetCode, CodeChef, HackerRank, and GeeksforGeeks.
- LeetCode Rating: 1549+ | CodeChef Rating: 1419+, achieved through consistent contest participation.
- Attended 100+ competitive programming contests across all major platforms.

TECHNICAL SKILLS

Languages: C, C++, Python, Java

Web / Stack: HTML, CSS, JavaScript, React, Node.js, Express, Next.js (MERN Stack)

Database: MySQL, MongoDB

Animation / 3D: Three.js, GSAP

AI / APIs: Groq LLM API, SendGrid, REST API Integration, PDF Parsing

Core Subjects: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems

Tools: Git, GitHub, VS Code

CERTIFICATIONS

- Programming in Java — NPTEL
- Linux Fundamentals — Red Hat
- SQL Basic — HackerRank

LANGUAGES

Tamil (Native) | English (Professional)
